

There are two options to print the schedule. If the subject you are viewing fits entirely in the window, and no verticle scroll bar appears, printing directly from the browser works fine.

If, like Physics below, there are more classes than what appears on the screen and there is a scroll bar some additional steps are necessary. Start by clicking the link for the searchable class report. This method can also be used to print the entire schedule.

This schedule updates every hour.  
For LIVE data on enrollments, [use our searchable class report](#).
